Dr. Mahalingam College of Engineering and Technology

Department of Computer Science and Engineering

IOT Assignment

Topic: Assignment on temperature and humidity sensing and alarm automation using python

Name: Nirutheesh R

Code:-

```
import random
while(True):
        a=random.randint(10,99) b=random.randint(10,99) if(a>35 and b>60):
        print("high temperature and humidity of:",a,b,"%","alarm is on")
        elif(a<35 and b<60):
                print("Normal temperature and humidity of:",a,b,"%","alarm is off")
                break
```

Output:

```python
import random
while(True):
    a=random.randint(10,99)
    b=random.randint(10,99)
    if(a>35 and b>60):
        print("high temperature and humidity of:",a,b,"%","alarm is on"
            )
    elif(a<35 and b<60):
        print("Normal temperature and humidity of:",a,b,"%","alarm is
            off")
        break
```

```
high temperature and humidity of: 46 95 % alarm is on
high temperature and humidity of: 84 63 % alarm is on
high temperature and humidity of: 48 67 % alarm is on
high temperature and humidity of: 62 78 % alarm is on
high temperature and humidity of: 55 92 % alarm is on
Normal temperature and humidity of: 25 41 % alarm is off
